

Seminars from 2000

Published on Nutrition & Obesity Research Center (<http://norc.uab.edu>)

Seminars from 2000

Date	Speaker	Topic
January 4	Roland L. Weinsier, MD and Members of the Executive Committee Department of Nutrition Sciences, UAB	What the New NIH-Funded Clinical Nutrition Research Center Can Do For You!
January 11	Douglas Heimburger, MD Department of Nutrition Sciences, UAB	Can Dietary Changes Really Prevent Cancer? Epidemiology vs. Randomized Trials
January 18	T. Tamura, MD Department of Nutrition Sciences, UAB	Folate Metabolism in Zinc and Iron Deficiency: Implication to Pregnancy Outcome
January 25	Marc L. Reitman, MD, PhD NIDDK, NIH	The Physiology of Fatless Mice
February 15	James C. Barton, MD Department of Medicine, UAB	Iron Nutrition in Hemochromatosis
February 22	Pi-Ling Chang, PhD Department of Nutrition Sciences, UAB	Suppressed Expression of Osteopontin Decreased Tumorigenic Transformation of Mouse Preneoplastic Cells
February 29	Philip Wood, DVM, PhD Department of Comparative Medicine, UAB	Roles of Fatty Acid Metabolism in Disease: Genetic and Molecular Mechanisms In Vivo
March 7	Rakesh P. Patel, PhD Department of Pathology, UAB	Free Radicals, Nutrition and Exercise: Potential Mechanisms for Protection Against Cardiovascular Diseases
March 21	Barbara A. Gower, PhD Department of Nutrition Sciences, UAB	Hormone Replacement Therapy and Body Composition: New Insights
March 28	Patrick P. Tso, PhD University of Cincinnati College of Medicine	The Role of Apoprotein A-IV in the Regulation of Food Intake
April 4	Steven J. Zullo, PhD National Institute of Mental Health	Is the Common Mitochondrial DNA Deletion of Man and Mouse a Biomarker of Aging Mitochondria?
April 11	David A. Bernlohr, PhD University of Minnesota	Adipocyte Fatty Acid Trafficking in Obesity and Diabetes Syndromes
April 25	Tim R. Nagy, PhD Department of Nutrition Sciences, UAB	Mechanisms Regulating Body Weight: Insights from a Novel Animal Model
May 2	Stephen D. Hursting, PhD National Cancer Institute	Nutrition and Cancer Prevention: Studies of Mice and Men
May 9	Marcas Bamman, PhD Department of Human Studies, UAB	Morphological and Enzymatic Characteristics of Skeletal Muscle in Obese and Normal Weight Women

Seminars from 2000

Published on Nutrition & Obesity Research Center (<http://norc.uab.edu>)

May 16	Mark Tarnopolsky, MD, PhD, FRCP McMaster University Medical Center	Creatine Monohydrate: A Potential Therapeutic Agent for the Elderly and those with Neurological Disorders
May 23	John Chatham, PhD Department of Medicine, UAB	¹³ C-NMR Spectroscopy - A Window into the Heart of Metabolism
September 12	Renee Desmond, PhD, Heidi Weiss, PhD, and Kathy Zhang, MS CNRC Statistical Core, Department of Nutrition Sciences, UAB	Longitudinal Data Analysis: An Introduction and Examples
September 19	Patrick Stover, PhD Cornell University	Regulation of Folate Metabolism and Status by Iron
September 26	Gary E. Truett, PhD Pennington Biomedical Research Center	A Developmental Switch for Obesity
October 3	John Forder, PhD Department of Medicine, UAB	The Future of Magnetic Resonance: Star Trek Reality
October 10	Gary Hunter, PhD Department of Human Studies, UAB	Metabolic Difference Between Black and White Women
October 17	Mary Hagen, PhD Department of Psychology, UAB	New Insights into the Role of the CNS Melanocortin System in the Control of Food Intake and Body Weight
October 24	Paul Brookes, PhD Department of Pathology, UAB	Mitochondrial Uncoupling Proteins - Certainties and Uncertainties
November 7	Janet Isaacs, PhD Department of Nutrition Sciences, UAB	Nutritional Management of Inborn Errors of Protein Metabolism
November 14	Isao Eto, PhD Department of Nutrition Sciences, UAB	Cell Cycle Control of Tumor Promotion
