[Full CV](#) [2]

I received my Ph.D. in Information Science and Technology from The University of Tokyo in March 2014. I joined the Nutrition and Obesity Research Center (NORC) and Office of Energetics in September of 2014. My research interest is to understand the obesity epidemic with mathematical model, For my post doctoral research, I'll focus on (1) quantification of the impact of vertical transmission of obesity on demography, (2) quantification of the transmission potential of obesity based on the empirical data.
