Promote Healthy Diets and Physically Active Lifestyles among Children and Adolescents

Conference Overview

One-day conference focuses on comprehensive prevention of obesity in children and adolescents. The conference will address model population/system-based interventions and direct client programs and services that are being implemented throughout the United States.

Conference Objectives

At the end of this conference, participants should be able to:

- ◆ Understand the importance of healthy diets and physical activity for child and adolescent well-being.
- ◆ Identify public health initiatives and partnerships that can be implemented to promote healthy diets and physical activity among children and adolescents.
- ◆ Discuss how to engage children and adolescents to participate in healthy diets and physical activity.
- ◆ Apply elements from cutting-edge initiatives taking place across the United States to local settings.

Target Audience

This conference is designed for public health nutritionists, dietitians, public health researchers, and others who are interested in promoting healthy lifestyles among children and adolescents.
